# THE PROPERTIES OF ZINC AND ITS IMPORTANCE

---

In the human body there are a wide variety of elements that play an important role in the functions and health of our body, including the state of the skin. One of these elements is **Zinc**.

The properties of this mineral are associated with the immune system, it also has a **great influence on cell growth and tissue regeneration**, which is why it is of vital importance during childhood and pregnancy, in the case of women. It should be noted that **after iron, zinc is the most important mineral** for the health of the human body.

Zinc prevents the accumulation of free radicals; avoiding the appearance of pimples and spots in addition to reducing the chances of blemishes, in fact acne breakouts are often associated with Zinc deficiencies.

It should also be borne in mind that zinc **plays an important role in cell regeneration**, so its deficiency can manifest itself in slow growth in fully developing children or in pregnant women.

For its part, plant-based foods that provide zinc to our body are **yeast, algae, soy** and **whole grains**. In addition, other foods with high levels of zinc are dark chocolate, brown rice, peanuts and watermelon seeds, which in addition to helping with zinc deficiencies also provide antioxidants and magnesium to our body.

# OUR CLIENTS

## GIVE THEIR OPINIONS:

### Gràcia Ramonell ★★★★★

I value the experience and the treatment during the treatment with Grant a 10 out of 10. Grant is a great professional and he proved it to me from the first moment, in addition, the whole team is exceptional. I was very pleased with the treatment, so much so that I decided that no one else would touch my face. I have recommended it to everyone who has commented to me that they would like to do micropigmentation.

### Jesus Beltran

★★★★★

Throughout the entire process the treatment is exquisite and personalized and I can say that I had 100% satisfaction. In addition, I have already recommended it to several friends.

### Marga Dalmau

★★★★★

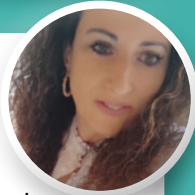

Jessica has my full support and respect. The experience with her was 10 out of 10. The treatment was great and I am very satisfied. I definitely recommend it to everyone.

### Magdalena Rebassa

★★★★★

I would recommend them without a doubt, it's a great team. During the treatment the approach was exceptional, at all times Jessica was taking care of me, an unbeatable care. I would value the experience of 10 out of 10 and would definitely repeat it. I must say I am delighted.

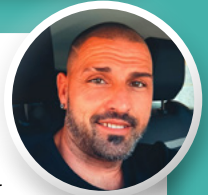

### Victor Mato

★★★★★

Paco's approach is familiar, professional and made me feel very comfortable at all times.

I was very satisfied with the result and the improvement achieved.

I have recommended it from the first moment to many friends who have asked me for my change.

### Llorenç Barceló ★★★★★

The experience was very positive and satisfying. At the first visit they explained the whole procedure to me, the duration of the sessions and practically the final result of the treatment.

Paco was very close hearted, kind and attentive to me at all times and a great professional.

I was very pleased with the result. It is a practically painless, economical and non-invasive treatment.

I have already recommended it on several occasions. It's an aesthetic matter to improve self-image and they accomplish that improvement!!

# SPONSORSHIP JUNIOR WOMEN'S BASKETBALL CLUB OF THE CITY OF INCA

**T**hroughout history, **women have struggled to make ends meet against the prejudices** and difficulties posed by a society that believed that they could not, or should not, play sports. The efforts made to prove that nothing is further from reality have not been in vain.

**Basketball** is one of the most widely licensed women's sports, a fact that reflects the absolute dominance of this sport in the female sex. In addition, in our immediate environment, women's basketball has achieved several historic milestones, which has given it even more relevance.

This importance and dominance has not been reflected in television, sponsorships, salaries and informative importance, which shows that there is still a long way to go towards real equality.

**Local businesses need to get involved and support** those close initiatives that help improve our society; In addition, it is always good news for young people to play sports. That's why, and because we strongly believe in supporting local sports, from Grant Ashley micropigmentation, we support our city's basketball Club by sponsoring the Ciutat d'Inca Club Junior Basketball Women's Team.

# PERFECT LIPS

## FROM MORNING TO NIGHT

## WITHOUT THE NEED OF MAKEUP

Our specialist Jessica Souto tells us about a specialty that is increasing in demand, and if you are looking for a **more durable and less invasive alternative** to botox or hyaluronic acid to improve the appearance of the lips, micropigmentation is a technique. semi-permanent makeup that will beautify the face and highlight the sensuality of the lips.

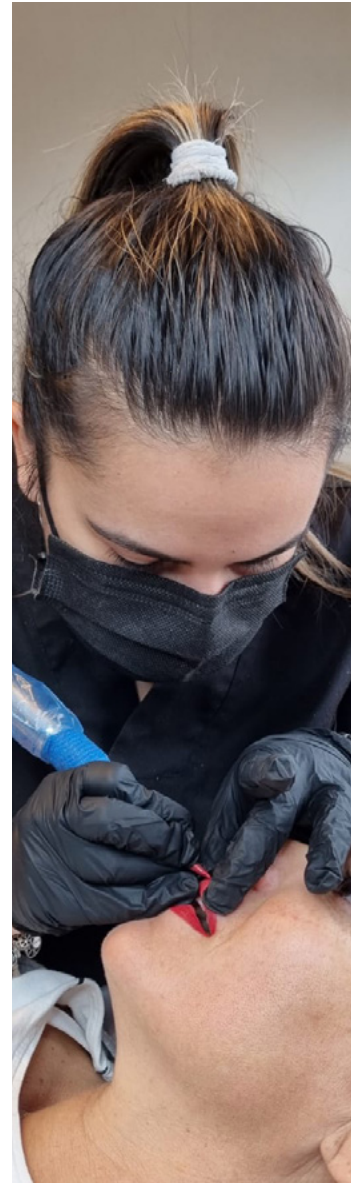

According to Jessica Souto, this technique works *“to give a visual sensation of more volume and more definition to the lips by contouring them so that they look bigger and fuller”*, as well as making them perfect from morning to night without the need for make-up”.

As the specialist explains, *“more and more people are opting for a micropigmentation treatment that improves their features and can hide any defects or aesthetic complexes.”*

Micropigmentation is done with needles, as if it were a tattoo but working at a more superficial depth and using mineral pigments. Jessica Souto explains that, like any beauty treatment, *“micropigmentation requires a series of tips that must be followed before, during and after treatment to accelerate healing and achieve optimal results.”*

After the treatment, during the first days, *“the lips might slightly peel and the color may look irregular, it may even seem to lose all its pigment completely”* according to Souto, after more or less a month, *“the pigment reappears naturally and the final result can be observed”*.

During the appointment, the shape and color of the pigment is decided according to the skin tone, so it is a meticulous process. The first thing that is done, once the consent has been signed that includes all the information about the treatment that will be performed, is the design of the shape and tone of pigment chosen for the patient. **Once everything is to your liking, the lip micropigmentation treatment begins.**

### Cures after lip micropigmentation

- Avoid sunbathing for the first week.
- Apply cold to the lips for the first hours.
- Apply Bepanthol or neutral Vaseline to the area.
- Do not put on make-up for a week.
- Avoid spicy foods for the first few days.
- Try not to smoke for at least 2 hours after treatment.
- After a week, always use high protection sunscreen to the area.
